PROFESSIONAL SUMMARY

Salesforce Certified Platform Developer I and OmniStudio Developer with 1 year of hands-on experience building scalable CRM solutions using Apex, Apex Triggers, Batch Apex, Lightning Web Components (LWC), Salesforce Flows, SOQL, and REST APIs. Proven ability to translate complex business requirements into automated workflows, responsive UI components, and production-ready Salesforce features. Additional expertise in UI/UX design (Figma) and Python-based AI applications. Adept at delivering results in Agile/Scrum environments with cross-functional teams.

TECHNICAL SKILLS

Salesforce: Apex, Apex Triggers, Batch Apex, Lightning Web Components (LWC), Visualforce, Salesforce Flows, SOQL, SOSL, Sales Cloud, Service Cloud, CRM Configuration, Salesforce Developer Console
API & Integration: REST API, SOAP API, JSON, Postman
Programming Languages: Python, JavaScript, Apex
Web Technologies: HTML5, CSS3, JavaScript
UI/UX Design: Figma, Wireframing, Prototyping, Responsive Design
Database: MySQL, PostgreSQL, SOQL
Tools & Platforms: Git, GitHub, VS Code
Methodologies: Agile, Scrum, OOP, Data Structures, REST API Design

EXPERIENCE

Software Engineer <i>CRMantra Technologies Private Limited</i>	May 2025 – Mar 2026 <i>Kochi, Kerala</i>
- Developed 10+ reusable Lightning Web Components (LWC) in Salesforce Sales Cloud, improving UI consistency and reducing front-end development time by approximately 30%. - Automated 5+ business workflows using Apex Triggers, Batch Apex, and Salesforce Flows, eliminating manual data-entry tasks and cutting CRM process time significantly. - Implemented REST API integrations to connect Salesforce with third-party services, enabling real-time data synchronisation across platforms. - Designed and configured custom objects, validation rules, and SOQL-optimised queries to support scalable data modelling across 3 client CRM deployments. - Collaborated with cross-functional teams in Agile/Scrum sprints to translate business requirements into production-ready Salesforce features, consistently meeting sprint deadlines. - Created intuitive UI wireframes and prototypes in Figma, applying UX best practices to improve user adoption of newly released Salesforce features.	

CERTIFICATIONS

Salesforce Certified Platform Developer I	May 2025
Salesforce Certified OmniStudio Developer	July 2025
JavaScript (Basic) – HackerRank	Jan 2025
SQL (Basic) – HackerRank	Jan 2025
Programming Fundamentals Using Python – Infosys Springboard	Aug 2024
IBM Artificial Intelligence Fundamentals – IBM	July 2024
CSS (Basic) – HackerRank	Aug 2024

PROJECTS

Hand Bone Fracture Detection <i>Python, TensorFlow/Keras, OpenCV, Flask</i>	
- Built a deep learning CNN model to detect hand bone fractures in X-ray images, integrating image preprocessing and binary classification with OpenCV and Keras. - Deployed the model via a Flask web application with a user-friendly GUI, enabling clinicians to upload images and receive instant diagnostic predictions.	

WeatherNow – Real-Time Weather Forecasting App | *HTML5, CSS3, JavaScript, OpenWeatherMap REST API*

- Developed a fully responsive web application delivering real-time weather forecasts and 5-day outlooks via OpenWeatherMap REST API integration.
- Implemented dynamic location search, unit toggling (Celsius/Fahrenheit), and a clean mobile-friendly UI, improving usability across all device sizes.

EDUCATION

Government Engineering College, Barton Hill

Dec 2021 – Apr 2025

B.Tech in Information Technology

CGPA: 7.34

Pandallur Higher Secondary School

2018 – 2020

Plus Two (Class XII)

Percentage: 94.9%

Pandallur Higher Secondary School

2015 – 2018

SSLC (Class X)

Percentage: 100%
